May 5, 2009

Dear Parents,

Prospect Pediatrics thanks you for choosing our practice. We are privileged to be trusted with the future healthcare of your children and have been doing so in this area for over 25 years. We would like to take this opportunity to stress the importance of seeing us as your **MEDICAL HOME** and know we are working to ensure that we meet your needs.

Due to the recent tragic event of an athlete in the Metro Louisville area, we are encouraging all Sports Physicals to be provided by our physicians. We are aware of your child's complete medical history and medications, which are not available to the Retail Based Clinics or convenient care clinics. We are also discouraging team screening at the local schools, because we feel there is inadequate history taking and counseling of our patients. In order to accommodate you, we have early morning appointments, and can accommodate same-day appointments in most situations. We also have Saturday morning well check/sports physical appointments during the summer for school age children.

Dr. Pamela Biddle is pleased to announce that she is now offering appointments for pediatric and adolescent gynecology. As a practice, we are glad to offer these services to our female patients in a comfortable environment and with familiar staff. Please call for an appointment if you or your daughter would like to address concerns of:

- Puberty and development
- Painful or irregular menstrual cycles
- Diet, exercise, and body image
- Depression, anxiety, and stress
- Other issues of preteens and teens

Our entire staff looks forward to making your visit a positive one for you and your children. Please call today to schedule an appointment.

Sincerely,  
Physicians of Prospect Pediatrics, PSC
